Introduction

The process of socialization is very important to development of political perception of human being. In Chandigarh city we find out that political perception determined by the surrounding atmosphere which was not properly developed in Chandigarh city. It is individual's attitude and orientation towards politics that constitute what is called political culture. Which to a great extent determines the nature and functioning of political system?

But how is the political culture shaped and how does it come to be what it is? That is how do students develop their political attitude toward political system characterized by interact network of knowledge, value and attitude transmitted between and the group of individuals within political system.

These are the questions how student determine and which factor's effects to mind set of student political behaviour. In this article we selected 50 students of higher education centre and analysis to the perception of political thought and level of the thinking about politics.

Method

Data was collected through a scheduled with personal interview on 20 question with the selected for to analysis student perception on additional politics. Respondents selected from Chandigarh region which involve at higher level education programme. The main characteristics of Indian Society during this period transactional from traditional to modern and youth political behaviour change rapidly but the emotional issues time to time convert the nature of youth toward political perception. Globalization and social transitions objective reality of current construction of socialist modernization and it is also time background of studying political perception among university students.

University student's perception toward Indian political system environment and the values in our observation we observe they disconnected from politics. The main attributes of these phenomena arise from the nature of politics and social environment. The following sub section focus on the main points of study what is the main points towards dullness of youth toward political system.

Alienation from politics

The main point for determines youth perception toward Indian political system also influenced by state efforts to development of opportunities to development. As well as state future to generate employment the perception of university students will be negative. In depth discussion with in respondent we point out that surrounding culture also effects to the ideology of respondent and they like to discuss local issues

and most by the review book, news paper, and other natural to be studied focus on the local politics dominantly.

Political Empowerment is very significant issue to university students for example in last month. There were the possibilities for student union election but they suspended till next date in this process the university students' political development effected by that activity so state should give direction to provide all opportunities for university student perception develop for thinking about political development of higher education students.

In our study more than 60% University student have not proper knowledge about recent issued in our political system. Some University students who involve in completions they have greater knowledge about Indian Political system and recent trends of political parties policy.

There is one important factor Rural back ground respondents not well non about recent trend is political system.

Political parties at the time of student union election frequently contact to student leaders but all over years they disappear from university campus an amperes only at the time of election to use the youth in election for his favour so in this process real political development not properly effect to mind of university students.

One most important factor also analysis during the integration of university students in depth knowledge about politics is a prerequisite for the effective political participation. University education is a key component for the accumulation of this perception. In our political system a lot of politicians are not educated because in our political system economy is most important factor to determine the consequences about political system. So that are the economic background to strongly effect political participation of university student is politics.

The purpose of this study was to understand perception of university students towards political system and to know what factor effects to the perception of university student about politics most of the university students want to see a change of present scenario in the present political system. The study further demonstrate that university student have not positive perception toward political system, they wants to see a change in present political system.

Some points important in this study discussed as following

- Family factor is the most influence political Behaviour of higher Education students give an impact in campus life.
- Management of political campus politics also determine to political Behaviour of higher Education students.

- University leadership hopes also influence political perception of higher educate students.
- Social Environment and geographical conditions also effects to students perception.
- State politics and local political party also effects to political perception of higher educated youth.
- In higher educated students one most important role to determine political perception.
- Higher educated students who involved in active politics they try to maintain the relationship student's leader and local political parties.

Conclusion

In our study some fact which observed in this study university student wants to see institutional changes in present situation. The recent trends in political culture need to modify. University student wants all over year frequently contact of political parties not a specific time (at the time of student union election) higher educated student wants change in our culture which permitted to capitalist to participate directly or moderately in medium politics. One important issues security effects attitude of university student's perception toward medium political system. University student participate in local politics dominantly and developed a now trend. The achievable and effective engagement of university students in politics could bring beneficial change to current political perception, this may also contribute to merge participation in politics by higher educate youth. State should conduct the workshops and seminar to develop the political perception of highly educated youth.
